

RECYCLE

Why waste it?

Recycle your E-waste!

What is E-waste?

E-waste is any item with a cord, battery or switch that is broken, unrepairable or no longer useful. E-waste is growing at three times the rate of any other waste stream.

Did you know that E-waste is banned from landfill?

Since September 2013, **e-waste** has been **banned** from direct **landfill** disposal across all of **South Australia** under the Environment Protection (**Waste** to Resources) Policy 2010

Why waste it? When you can recycle it?

E-waste can contain hazardous materials including heavy metals and glass which if broken or damaged pose an unacceptable environmental hazard.

E-waste can be readily recycled (including 90% of what is used to make televisions and computers), saving valuable, finite resources.

Alternatively, these items may be dropped to a transfer station, scrap metal recycler or picked-up as part of your hard waste collection.

RECYCLE

Why waste it?

Recycle batteries and mobile phones!

Why recycle dead batteries and mobile phones?

Batteries and mobile phones contain valuable metals for reuse into new batteries mobile phones including:

Batteries	Mobile Phones
♻️ Cobalt	♻️ Gold
♻️ Lithium	♻️ Silver
♻️ Nickel	♻️ Copper
♻️ Manganese	♻️ Platinum
